COVID-19 Tès kolektif pou lekòl

Apèsi sou lekòl la pou fanmi

Poukisa nou fè tès depistaj nan lekòl yo?

1. Pou pwoteje sante ak sekirite elèv yo ak anplwaye yo.
2. Pou ede pran desizyon enfòme sou operasyon lekòl ak salklas yo.
3. Pou ede detekte ka COVID-19 menm lè elèv yo ak anplwaye yo pa montre sentòm yo.

KI SA KI "GWROUPMAN SALKLAS"?

Avèk gwoupman salklas, yo ka teste yon salklas tout antye lè yo itilize yon sèl tè s molekilè pou SARS-CoV-2.

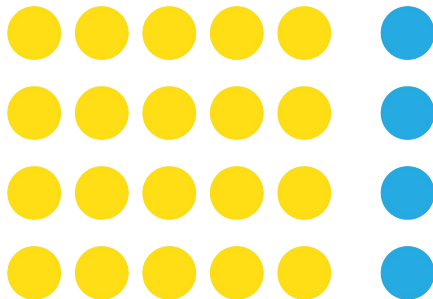

Sa a pral redwi pri a ak lojistik operasyon nan siveyans tè s nan lekòl K-12.

Lekòl yo ak distri a ap gen enfòmasyon ki nesesè pou decide si pou kenbe lekòl yo oswa bilding yo louvri.

KI JAN LI FONKSYONE?

1. Tib la ouvri li sou yon biwo oswa yon tab, nan yon tas kafe oswa nan yon lòt bagay ki kenbe li dwat.

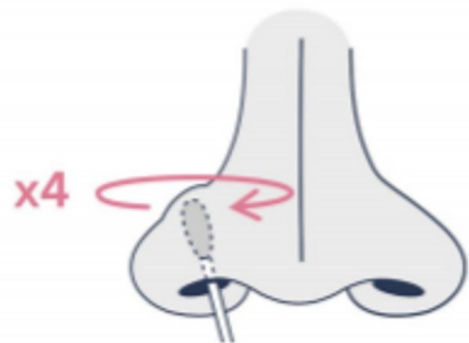

2. Tout moun nan yon salklas resevwa yon prelevman nen sele. Yon ti gwoup (apeprè 3-5) yo mande pou prelevman tèt yo pandan yon pwofesè obsève. Apre yo mete prelevman yo nan tib ouvè a, yo rele pwochen gwoup la. Pwosè la an antye pran 10-15 minit pou yon sal klas.

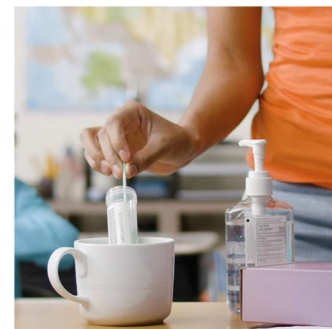

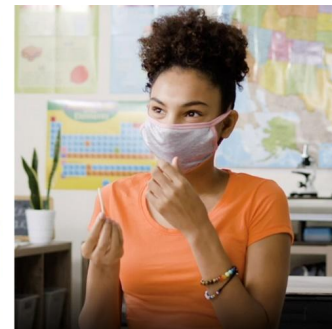

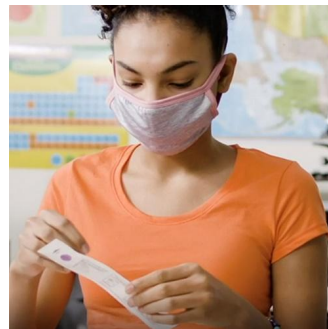

3. Tib la kouvri, esterilize ak yon pad alkòl, epi retounen bay Sipèvizè Egzamen an pou enskripsyon ak chajman.

KI JAN LI FONKSYONE?

Pi ba nen (antérieure nen) prelevman yo san doule ak fasil pou pwòp tèt ou-administre.

koleksyon nen pou pwòp tèt ou Pwosedi Tès

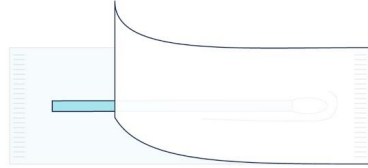

1.

Netwaye men ou

Lave men ou oswa itilize dezenfektan pou men.

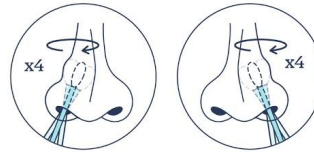

2.

Ouvri prelevman an

Peye anbalaj la ouvri li tankou yon pake fwomaj fisèl. Fè atansyon - pa manyen pwent koton an.

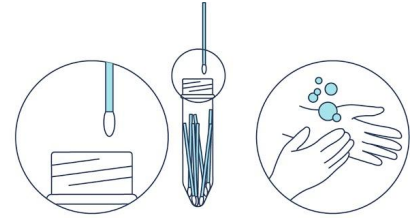

3.

Nen ou

Mete pwent koton an nan yon sèl twou nen. Fè dou epi sispann lè ou santi ou pouse tounen. Fwote prelevman bò kote outwou nen nan yon sèk 4 fwa. Asire w ke pwent koton an touche anndan nen ou tout tan. Konte, "1, 2, 3, 4- chanje" Lè sa a, fè menm bagay la nan lòt twou nen ou.

4.

Mete prelevman an nan tib la

Ak anpil atansyon mete prelevman an nan tib la. Mete pwent koton an bò desann, pa leve epi asire w ke ou pa manyen tib la. Lè sa a, netwaye men ou. Ou fini! Woohoo!
